Washington, Sept. 32.-The war investigation complission today decided to on Jeneral Lee to follow General Veneeler in giving testimony concernhe the charges made against the war department, and suggested Wednesday next week as a date when he could be heard. The commission today continued its examination of letters bearing upon charges of mismanagement—some calling attention to such charges and others attempting to refute them. Many of the letters referred to newspaper reports of abuses, and in most cases letters were sent to the editors in question, asking them for precise information.

"The commission would be glad to have testimony of a kind that can be used in this investigation, not only relating to the circumstances attending the death of Lieutenant Lafferty at Camp Wikoff, as alleged in the article under consideration, but also relating under consideration, but also relating to the other incidents to which you make reference. Such testimony is exactly what the commission wants. Will you oblige this body with what you have at your disposal, or can obtain,

for the purpose?"
Today's letters deal especially with the conditions at Camp Wikoff. They rejate to the lack of preparation of the camp before the soldiers were received. A minister wrote that he had pointed out the inaccessibility and exposed condition of the location and the poor condition of the water before the place was selected.

few days in the Virginia mountains, upon the recommendation of his physi-chan. General Lee has been suffering somewhat from malaria.

There seems to be no doubt in of-ficial circles that General Lee is scheduled to go to Cuba. Some question has arisen, however, as to the post in Cuba that he will scrupy. Quite a number of public men, and it is probable that General Lee himself, would prefer that his command go to Havana. There is some sentiment in the matter and some persons have ex-pressed the hope that as Blanco marches out, General Lee might march merches out, General Lee might march into the city. A number of men in of-ficial life have already interested them-selves in the subject and will urge the president to issue his orders for the occupation of Cuba with this end in

Detroit, Mich., Sept. 20.—It has been asserted in many quarters that General Staffer in his report to the war department spoke slightingly of General H. M. Duffield and his part in the Santiago campaign. Shafter's allexed remarks in his report on the feint of General Duffield's brigade at Agnadores are said to have been the tasts of the above mentioned feeling of slight to Duffield. Today General Duffield received a telegram from Secretary Alger, which, his friends think, is a vimilication by Shafter of the allexed slight. In this telegram Secretary Alger quotes a message just received from General Shafter in which the general says: General Duffield did all that he was expected to do in a most satisfactory manner. In looking over my report I see that the reference to his action at Aguadores was not clearly expressed and it escaped my notice. There was no intention that he should do more than make such demonstration as would hold the enemy's troops at that place. To have attacked it with a view of its capture with the force under Duffield would have been the height of folig."

Little Child at Rock Springs Killed By Exposure.

(Special to The Heraid.)

Rock Springs, Wyo., Sept. 20—The little 20-months old daughter of Charles Edd reported mysteriously missing in the dispatches, was found dead this morning four miles east of town in a canyon in the side of the mountain, a little to one side of the main traveled road. How this little child walked four miles, partly overrough country, crossed the railroad and litter creek, then along to the main traveled road that runs tarallel with the Union Pacific militroad without being seen by anybody, is beyond the comprehension of everybody that knows the country. The parents are nearly distracted with grief over the death that befell their little one alone in the mountain without food and water and at the mercy of the early fall storms that have already set in here. Says Spain Must Relinquish the Entire Philippine Group-Sentiment of the Country Demands It and We Are Under Obligations to the Insurgents - Willing That Congress Should Decide the Form of Government-Insurgents Tractable

Cleveland, O., Sept. 30 .- The Leader has from its Washington correspondent the following interview with Senator Hanna concerning the Philippine question, which is believed to represent the views of President McKinley;

"I do not know what the instructions given to our peace commissioners are," said Mr. Hanna, "but so far as concerns the negotiations which will be instituted in Paris tomorrow, I can see no other result than that Spain will have to relinquish her sovereignty over not only Luzen island, but the entire Philippine archipelago. Spain has no reason to expect to be able to retain any portion of the group. She went into the war and lost, and now ought to be prepared to suffer the consequences which such a defeat implies. I regard the Philippines as lost to Spain, and that being a foregone conclusion, in my opinion, the problem which next confronts us relates to the form of government which we will give the Islands.

"When the Philippine question first presented itself, there was a strong sentiment among conservative, farseeing and thinking men in this country which favored the retention by the United States of merely a naval base and coaling base in the Islands—this hase presumably being Mania and the bay contiguous thereto. Since then however, this sentiment apparently has undergone a very marked change, and it now appears that for the most part these same men who at first believed we should occupy Maniha alone, are advocating the termination of Spalin's rule in the whole group. "I do not know what the instructions

It is not at all certain, of course, that we will encounter any such obstacles, though it is assuredly among the probabilities. However, from what I have read of the mission of Agoncillo, the personal representative of Aguinaido, the insurgent chieftain, we may find the Filippinos tractable and willing to accept whatever form of government we will finally decide upon, so long as Spain will have no hand in its administration."

Regarding the reports which come from Paris that one of Spain's propositions to our commissioners will be that the United States pay her \$100,000,000 for the relinquishment of the Philippines, Senator Hanna said significantly. "We are not paying money for or buying territory which we now con-trol."
